SUMMARY

AI & Data Science undergraduate at Velammal Engineering College with hands-on experience in Python, JavaScript, Java, and full-stack development. Proficient in React, flask MongoDB, and MySQL. Skilled in designing scalable web and machine learning solutions. Developed projects ranging from hospital management systems to ML-based childcare and safety applications. Certified in Infosys Springboard, MongoDB, Python, Java, and Full-Stack Development. Seeking opportunities to apply AI, ML, and full-stack expertise in impactful real-world projects.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

Velammal Engineering College, Chennai | 2023

HSC (12th Grade)

Sri Sankara Matric Hr. Sec. School, Peralam | 84% | April 2023

SSLC (10th Grade)

Sri Sankara Matric Hr. Sec. School, Peralam | March 2020

CERTIFICATIONS

- Infosys Springboard (June 2025)
- MongoDB Basics (July 2025)
- Python Programming (September 2024)
- Java & Full-Stack Development (October 2023)

TECHNICAL SKILLS

Languages: Python, Java, JavaScript

Frameworks/Tools: React,Flutter, Git, Docker

Databases: MongoDB, MySQL

Concepts: Full-Stack Architecture, Machine Learning

PROJECTS

Personal Portfolio with Admin app

- Built a dynamic personal portfolio using React and Flask integration.
- Added interactive animations and user-friendly navigation for enhanced presentation.
- Developed a **React Native–based admin mobile application** to securely manage and update portfolio content.

DSP Elite Homes Ltd (Freelance Developer)

- Developed a responsive property listing web app for a UK client using React.

- Implemented search and filtering features with user authentication.

Hospital Management System & Patient Monitoring (Full-Stack Developer & ML Integration)

- Created a CRUD-based management system with React frontend and Flask backend.
- Integrated MongoDB database with secure login and appointment scheduling features

Agri Chatbot Mobile Application

- Built a React Native mobile app with an AI-powered, multilingual agricultural chatbot for farmers.
- Implemented a Flask (Python) backend with AI/ML and REST API integration.
- GitHub: https://github.com/praveen0309d/FARMER_APP

For more project view: github.com/praveen0309d.

INTERNSHIP

Infosys Springboard Internship – Virtual (Ongoing)

Duration: September 2025 – November 2025

Project Title: Global Wellness Chatbot using AI

- Engaged in AI-based chatbot design under Infosys mentorship.
- Working on NLP and user sentiment analysis using Python.

ACHIEVEMENTS

- **Velammal Institute Project Expo:** Secured 2nd Prize (₹3000)
- **Velammal Engineering College Project Expo:** Secured 3rd Prize (₹500)
- **Gojan School of Business Technology Project Expo:** Secured 1st Prize (₹2000)
- **Gojan School of Business Technology PPT Presentation:** Secured 3rd Prize (₹500)
- **New Prince College Of Engineering PPT Presentation:** Secured 3rd Prize (₹500)

EXTRACURRICULAR ACTIVITIES

- **Coding Practice:** Regular practice on LeetCode and HackerRank focusing on problem-solving and data structures.
- **Resume Building:** Developed this ATS-optimized resume applying current recruitment best practices.
- **Participation:** Engaged in hackathons, project expo and technical exhibitions at college.
